Powerful heat when you need it

G5 Gold

Powerful heat when you need it

When it comes to generating intense heat output, nothing comes close to the unparalleled superiority of our gold standard in heaters. This has remained our foremost heater for numerous years, particularly when implemented in exterior settings or in spaces requiring an additional boost of warmth.

Our most recent iteration of Gold elements (formerly known as UltraLowGlare) has been deliberately engineered to achieve a delicate equilibrium between optimizing heat production and mitigating glare. Ideally for outside areas and restaurants where the highest heat output is required.

About Us

Striking Energy has been providing distinctive heating solutions to the South African market **since 2009**.

Being an owner-run business enables us to prioritize certain fundamental values that benefit our customers in a manner that large corporations cannot. We pride ourselves on exceptional and **prompt customer service**, an extensive understanding of infrared heat, and a passion for tackling challenges.

- We understand our customers' requirements
- We manufacture quality, long-lasting products.
- We do this in an effective, honest, and open way, using only the best components to create durable and serviceable Infrared Heaters that last.
- We build most of our products locally to ensure that we can honor our warranty.
- We avoid cheap imports that are harmful to both the planet and our customers' wallets.
